

Clearpack offers Efficiency Improvement Solutions using IIoT devices

Over the last 28 years, we have installed and commissioned several hundred machines successfully across Asia, Middle East & Africa for various applications in Primary, Secondary and End of Line Packaging. Now, in addition, we have a system to help you monitor and improve the productivity on a real-time basis on your mobile or Laptop.

The solution involves:

- Providing Invisible supervision on each machine
- Locating and recording bottlenecks your lines and production shop floors
- Easy to read Dashboard on Mobile and Laptop on Real-time basis
- To Automatically alert the authorized person to help
- Monitor power cost per unit product on a shift basis

Once you have the data, you can then reduce the wastage (even Eliminate) of time and thus improve the efficiency of the line.

In short, we make your line and machine talk to you directly!
