It is a great honour to be named one of the top 50 SMEs in Singapore in such a challenging year, especially as we enter our 30th year of being in the industry this year. We view this as a recognition of our agility to be able to change our approach to the market quickly despite challenges faced last year.

We were able to rely on a few pillars of growth to carry us through the pandemic. We saw a greater number of innovation projects like automated guided vehicles (AGVs) and robotic applications which saw us through last year. Apart from this, we also developed an Industry 4.0 data acquisition tool which helped improve production efficiency for our customers, save cost and reduce energy consumption.”
