RSC Case Packer - RCP

FEATURES:
- Compact structure with mechanical parts mounted overhead to maximize accessibility and cleanability
- Quick and tool free changeover
- Modular design which allows integration of various feeding and collation systems for products in rigid packaging (bottles, trays, jars) or flexible packs (bags, pouches, doy packs, flow packs)
- Simple and clean design particularly suitable for food, personal care and home care industry.

RSC Case Packer - RCP

The RCP pick and place case packer is extremely flexible machine designed to pack products into cases, display boxes or trays. It is able to case pack a variety of rigid and flexible packs, from different infeed systems. The servo controlled robotic arm can be programmed for multiple pick up and placement positions within the machine envelope.
