

# Conveyors

## FEATURES :

- Low maintenance
- Bottle conveyors with standard stainless steel frame construction
- Proper line control and integration with upstream and downstream equipment
- Decentralized VFDs used to reduce installation time
- Lubrication system controlled as per the line circuit design to ensure optimum usage of lubricant

Even if the best and most efficient machines are selected in a production line, to maintain the agreed level of efficiency, you require the right choice in design and installation of interconnecting conveyors. With a broad range of conveyor solutions for bottles, individual packs, cases and pallets, competitively positioned in the market, we can provide complete scope of conveyors for all your needs. We use proven industry leading conveyor components from Rexnord, Systemplast, Intralox, Danfoss, Interroll and SEW motors to ensure reliability of conveyors.

Plastic table top chain conveyors are used for PET / HDPE containers & Tetrapacks, SS table top chain conveyors for glass containers or cans.
